Job Application for Senior Software Engineer

To the awesome recruiting team at regrow,

ABOUT ME

I am a software developer with over six years of experience. The majority of my development experience has been with ruby on rails but I also have experience with multiple other front and backend frameworks. I am passionate about building things. I love to dive in at every level of the design cycle and make things work. I believe strongly in highly collaborative teams that are focused on delivering product value to customers. I am currently residing in BC, but I am a US citizen and fully qualified to work in either the US or Canada.

WHY REGROW

I am looking to take my career in a direction that enables me to feel good about the contribution I am having on the world. The work being done at regrow is exciting and sorely needed. I love the idea of contributing at such a mission focused company. Helping to curb the environmental impact of agriculture is a huge step forward in solving the climate crisis.

WHY ME

I feel I am uniquely qualified for this roll. My experience aligns quite well with the job description, and I feel that I have demonstrated a track record of success in my previous positions.

- › 6 years of experience as full-stack software engineer
- › I have built multiple applications in rails, and became a go to resource for SQL debugging in several of my previous jobs.
- › I have worked at several startups at varying stages in their growth process.
- › I have worked at multiple B2B SaaS startups in growth mode
- › I have worked with Heroku, AWS, Kubernetes, Helm, GCloud, etc.
- › I have been told on multiple occasions that I am very good at explaining complicated subjects in an approachable way.
- › I am highly collaborative, and do my best work with other people.
- › Frequent user of /gif slack commandz

Sincerely,

Matt Severini
